

25th January 2018.

Dear Parents/Carers,

We have been notified that one of our nursery children has scarlet fever. This is a very contagious disease which can spread very quickly, with the infected person being contagious before the symptoms begin.

Symptoms are very similar to flu, but as we have a case of it in school it is best to get your child checked at your GP so that they can prescribe antibiotics if necessary.

For further information read the following information:

<https://www.nhs.uk/conditions/scarlet-fever/>

Thank you.

Yours sincerely,

Mr. N. Verdin.
Head Teacher.
