

Date: 08/12/2021

Dear Parent or Carer,

Over recent days we have been made aware of several children and staff in our school community who have tested positive for COVID 19.

I would like to take time to reassure you that we have taken all necessary actions since hearing this information to keep all children at our school as safe as possible. The school have consulted with the local authority and we are introducing some additional controls within certain parts of the school to reduce the chances of further spread of the virus. Our school risk assessment will be updated to reflect the changes in practice. For the next 2 weeks, we will introduce the following controls:

- **Hand sanitiser will continue to be in place on entry to school and after playtimes and dinnertimes. (If your child cannot use sanitiser they will be asked to wash their hands)**
- **Classrooms will continue to be well ventilated with windows open so please make sure your child has a cardigan or jumper on and additional layers such as vests.**
- **Face coverings will continue to be worn by staff in communal areas. We ask that all parents/carers continue to wear them at drop off and pick up.**
- **Enhanced cleaning will continue to take place in school, we use a fogging machine in each classroom daily to disinfect all rooms once the children have left.**
- **Separate breaks will be back in place for playtimes and lunchtimes, children will still play outside but we will be reintroducing sectioning off the playground so classes and bubbles play alone.**
- **Assemblies will return to being class based.**
- **Wake Up, Shake Up will stop from tomorrow but we will look at reintroducing it as soon as we can.**
- **Breakfast Club will alter slightly so that bubbles are reintroduced, if your child is EYFS you will receive a message with further drop off details via the app.**

Following this period of time, we will review these additional measures.

Currently, the most common strain of virus in the UK is called the Delta variant and we have seen a steep rise in COVID-19 cases recently. Evidence suggests the Delta variant spreads more easily than previous strains. It is important that we are vigilant and follow public health messages to stop the spread of the virus

## Household testing

Eligible household members should do a rapid test twice a week (every 3 to 4 days) to check if you have the virus. If people test positive and self-isolate, it helps stop the virus spreading. Even if you're vaccinated, there's still a chance you can pass COVID-19 on, so you should keep getting tested regularly. To access home test kits, please see the following link below: <https://www.gov.uk/order-coronavirus-rapid-lateral-flow-tests>

## How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

## Further Information

Further information is available at <https://www.nhs.uk/conditions/coronavirus-covid-19/>

## Symptoms of COVID 19

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from NHS 111 at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/> or by phoning 119.

Yours sincerely,

Neil Verdin,  
Headteacher
