

Wellcomm: Section 1

Your child has been screened using the Wellcomm screening tool. The results show that they need support with their communication in the following areas. We understand that they may be doing some of these things at home already, but they are not yet demonstrating these skills at school.

We will be working on these areas in class and would appreciate your support. If you can, please work on the areas that are highlighted at home when playing and talking with your child.

We will be rescreening your child in 12 weeks.

- Turning towards you when their name is called
- Relating 2 objects together in play
- Pointing at an object and then looking at you
- Following your eyes and face when you look at something
- Following simple instructions with non-verbal cues
- Holding up their arms to show they want to be picked up
- Copying an action or gesture
- Pointing to ask for something
- Babbling different noises
- Shouting to get the adults attention

If you have any questions or need help with how to work on these areas, please let us know as we are happy to help.
